

Important 500 Questions Of Biology part-3

Description

Hello Friends ! uploading the Important 500 Questions Of Biology part-3 serves as a crucial resource for students who are diligently preparing for exams. These questions cover a wide range of topics within biology, helping students to thoroughly revise and assess their understanding of key concepts.

By practicing these questions, students can enhance their retention of biological facts, improve their problem-solving skills, and familiarize themselves with the exam pattern. Additionally, having access to a comprehensive set of biology questions enables students to identify their strengths and weaknesses, allowing them to focus their efforts on areas that require more attention. Overall, uploading such important questions facilitates effective exam preparation and empowers students to approach their biology exams with confidence.

Important 500 Questions Of Biology part-3

What are the tissues in the body made of? **Protein**

The main component of honey is **fructose**.

Honey mainly contains? **Carbohydrates**

Vegetarians eat maximum protein? **from pulses**.

In the embryonic stage, the offspring die due to the formation of a blood clot inside the mother's uterus. This disease is called? **erythroblastosis fetalis**?. The reason for this is? **father being RH+ and mother being RH-**?.

Where is most iron found? **Green leafy vegetables**

Provides maximum energy? **Carbohydrate**

Sea weeds are an important source of? **Algae**

Which blood group is the universal recipient? **AB**

The element present in both cement and bones is? **Calcium**

What is cerebrum related to? **brain**

Percentage of protein in soybean is? **42 percent**

Sweat glands in mammals are basically related to **temperature regulation**.

Approximately what is the amount of CO₂ in our exhaled air? **4%**

Hemoglobin has maximum affinity for **oxygen**.

Which mineral is necessary to control heartbeat? **Potassium**

The heart is deprived of **voluntary muscle**.

What is the cause of cholera? **bacteria**

Avian influenza (Bird Flu) virus is denoted by? **H5N1**

Deficiency of which causes tooth decay? **Fluorine**

Barium meal is used for? **X-ray of the alimentary canal**

Which imaging device is used to detect kidney stones? **CT scan**

Deep fried foods are carcinogenic because they are rich in? **fats**

The toxicity of which heavy substance causes liver cirrhosis? **Copper**

Insufficient supply of blood in the human body is called? **ischemia**

Typhoid is caused by? **Salmonella typhi**

BCG Immunization is? **For T.B**

Apart from carbohydrates, there is a major source of energy in our diet? **fat**.

Which of these elements helps in forming blood clot? **Vitamin K**

BCG vaccine is suitable to generate immunity against? **Tuberculosis**

In the context of human anatomy, antibodies are? **proteins**

Jaundice is caused by the infection of? **Liver**

Which part of the human body does pneumonia affect? **Lungs**

Complete memory loss is known as? **Amnesia**

Which disease is not caused by water? **Flu**

Whose quantity decreases in anemia? **Hemoglobin**

The cause of small pox is? **Variola virus**.

The color of cow's milk is slightly yellow due to the presence of? **Carotene**

Which disease mostly spreads through air? **Tuberculosis**

Cereals are a rich source of **starch**.

The radioisotope used for cancer treatment is? **Co-60**

Energy source for various activities of the body is? **Carbohydrate**

Protein is most important for the development of children up to **14 years of age.**

Yellow fever is transmitted by **Aedes**

The vitamin that helps in preventing infection in the human body is **Vitamin A.**

ECG is **Electrocardiograph**

Which disease spreads through blood transfusion **Typhoid**

Deficiency of Vitamin B6 causes **anemia in men.**

Jaundice is a symbol of **liver disease.**

Vaccination against smallpox includes **live antibodies**

The name of the disease in which the sugar level increases in the blood is **Diabetes Mellitus.**

Which organ is generally affected by aflatoxin food poisoning in humans **Liver**

The cause of Minamata disease is **Mercury**

Which genetic diseases are sex-linked **Haemophilia**

Japanese encephalitis is caused by **virus**

Dialysis is used for people with damaged kidneys. The process involved in this is **Osmosis**

The organ whose functioning is revealed by EEG is **brain.**

Casein is milk protein

Due to deficiency of which element goiter occurs **Iodine**

Due to whose presence milk becomes sweet **Lactose**

Keeping pigs away from human habitation areas is helpful in eradicating **Japanese Encephalitis**

The virus known as **kill and hide** is **RSV virus.**

Doctors advise that we should cook our food in oil rather than vegetable ghee, because oil contains **unsaturated fats.**

Cholesterol is **fatty alcohol present in animal fat**

The main use of salt in diet is to produce small amounts of hydrochloric acid required **for digestion of food.**

Contains fat soluble vitamins **calciferol, carotene, tocopherol**

How much protein should a working woman take daily **45 grams**

Anosmia is the lack of **olfactory sensation.**

The calorie requirement of the body increases in winter compared to summer, because more calories are required **to maintain body temperature.**

National Institute of Nutrition is a research institute located in which state **Andhra Pradesh**

Neuroceuticals are products that have **nutritional and medicinal effects.**

The white color of milk is due to the presence of **Cassim**

What should approximately be in a balanced diet **1/5 protein, 1/5 fat and 3/5 carbohydrate**

In what form are carbohydrates stored in plants and animals **starch and glucose**

What causes a heart attack **Lack of blood supply to the heart**

Where do people working get black lung disease **Coal mines**

Where was the painful bone disease **itai-itai** first detected **Japan**

Cadmium pollution is associated with **Itai-Itai**

Who is the vector of Kala-azar **Tsetse fly**

Who invented the vaccine for smallpox **Louis Pasteur**

White lung disease is found in **cement industry employees**

The most tried medicine for AIDS virus is **Zidovudine (AZT).**

Which microorganism causes hepatitis B **Virus**

The main disease caused by asbestos is **emphysema.**

Amla is useful in the treatment of **scurvy.**

BMD test is done to identify **Osteoporosis**

AIDS is caused by **virus**

People who drink heavy amounts of alcohol die from **cirrhosis**.

Whose disease is causing simple goitre? **Thyroid gland**

The infectious stage of malaria is? **sporozoite**.

Which fungal disease is? **Eczema**

Chicken pox is caused by? **DNA virus**

What is called? Black Death? **Plague**

What causes deficiency in the human body due to dengue fever? **Platelets**
